Angus Energy Plc
("Angus Energy" or the "Company")
Operations Update
Schedule of Works at Brockham

Angus Energy (AIM: ANGS) is pleased to announce that the rig has now been
demobilised. Additionally, having set the plug, and function tested the downhole pump we believe
that we have, as planned, successfully isolated the water zone without bringing hydrocarbons to
surface. This is in line with our timetable of works as published in RNS of 3 April 2019.

We will now analyse the results with our partners before proceeding to the next stage which would
involve bringing on site full well testing equipment and commencing flow tests.

George Lucan, interim Managing Director, writes: "We set out a detailed timetable of works at
Brockham and have completed the first stage of works efficiently, safely and on time."

Qualified Person's Statement:

Andrew Hollis, the Technical Director of the Company, who has over 40 years of relevant experience
in the oil and gas industry, has approved the information contained in this announcement. Mr Hollis
is a Fellow of the Geological Society and member of the Society of Petroleum Engineers.

END.
