**Update on Brockham Oil Field**

The Company is pleased to announce that the Planning Committee of Surrey County Council today passed a resolution to approve the Company's plan to abandon the Kimmeridge layer and re-perforate the Portland layer in well BRX4-Z subject only to a unilateral undertaking to secure a routing agreement on HGV movements.

Angus' existing Environment Agency permit requires minor variation to allow production from the Portland as opposed to the Kimmeridge in this well and the Company is in discussion with officers of the Agency in this regard. Following such variation the Company would proceed to re-perforate at the earliest opportunity.

We expect to update the market on existing production from BRX2-Y now supported by water injection in the coming fortnight.
